19	37259	COMM	A235	101	Small Group Communication	3	Barton, Teresa	W 11:30-12:45P & Online			Every day we engage with others in small group settings. Whether we are spending time with family and friends, working with classmates, hiking with an outdoors club, or attending a work meeting, we are utilizing small group communicative strategies. This class studies the theories and skills related to communicating in small groups by focusing specifically on group relationships and group decision making in both personal and professional contexts. Students will develop or refine their communication skills through class exercises, activities, problem solving, and group presentations—skills necessary in the modern workplace. Please note that this class is designed for both distance and location based students. All class material will be provided through Blackboard. For location based students we will meet every week on Wednesdays during class time (11:30AM to 12:45PM) to put the theory into practice. For distance students similar weekly activities will be provided. I will also be available on campus and through Skype to work with students individually. Required textbook: Communicating in groups: Applications and skills; 9th Edition; Author: Adams, K. L. & Galanes, G. J.; ISBN: 978-0073523866
